

Provide CPR HLTAID001

Scenario-based learning and assessment. Learn the skills to save a life.

Respond to an emergency situation; manage unconscious casualties; perform CPR procedures including operation of an automated external defibrillator (AED); communicate details of the incident.

Key Benefits:

- Nationally recognised Statement of Attainment issued upon demonstration of competence
- Comply with Australian Resuscitation Council Guidelines
- Accepted in mining, oil, gas, transport, construction, health, government, education, marine and other industries
- Be assured of competence – each student has plenty of hands-on practice on adult and infant manikins and with various AEDs
- Maintain your skills and ensure compliance with workplace requirements for currency of training
- Our blended learning option reduces the amount of face-to-face training time – great option for shift workers, stay at home parents, students, small business owners or those who are simply busy!

Pre-Requisites:

Nil. Students attending a recertification course may prefer our blended learning option

* It is a requirement of this course that you are physically capable of performing at least 2 minutes of uninterrupted CPR on a CPR manikin placed on the floor

Course Duration:

Half day or equivalent – ask us about our blended learning option

Target Audience:

People who may be required to provide CPR in a range of settings, including workplace and community settings
